

## Combination Ice Bins with 8" Bottle Storage

ROYAL SERIES

KR19-MS26L

KR19-MS32R

KR19-MS46C

### Standard Features

- 12" deep ice bin with 1" drain, 1/2" drain with cold plate units
- Insulated 8" bin for storage of liquor bottles, cheater bottles, elixir bottles, etc.
- Insulated bin section with 1" drain
- Soda line access cutout in rear on cold plate units
- Optional built-in speed rail
- 7 or 10-Circuit cold plate available depending on model
- Ice bins with cold plates include 1/2" x 6" PVC tailpiece (1/2"- 20 male threaded)
- Ships as a complete station

### Specifications

|                      |                                                                                                                                                                                                                                                                                                                |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Material</b>      | Interior: 20 gauge stainless steel; 12" deep ice bin section, 10" deep bottle section<br>Front Apron: 20 gauge stainless steel clad over 20 gauge galvanized steel<br>Backsplash: 20 gauge stainless steel; 6-1/2"H x 1-1/2"D<br>Back and Bottom: 20 gauge galvanized steel<br>Sides: 20 gauge stainless steel |
| <b>Legs</b>          | 1-5/8" tubular 16 gauge stainless steel with grey plastic bullet foot                                                                                                                                                                                                                                          |
| <b>Insulation</b>    | Foamed-in-place polyurethane                                                                                                                                                                                                                                                                                   |
| <b>Cold Plate</b>    | Cast aluminum post mix plate with 7 or 10 circuits<br>Plate is sealed into bottom<br>Each circuit is 5/16" OD stainless steel tubing; Two full with remainder to be half circuits<br>Bump and swedge fittings on end of circuits                                                                               |
| <b>Plumbing</b>      | 1" NPS drain bottle section, 1" IPS drain ice bin<br>Ice bin with cold plate includes 1/2" x 6" PVC tailpiece (1/2" - 20 threaded)<br>PVC tailpiece required to avoid condensation through metal to metal contact.                                                                                             |
| <b>Tubing Access</b> | 3/4" x 3-1/2" cutout in left side of backsplash                                                                                                                                                                                                                                                                |
| <b>Legs</b>          | 1-5/8" tubular legs with grey bullet feet                                                                                                                                                                                                                                                                      |
