MASTERTAP™

BEVERAGE DISPENSING SYSTEMS

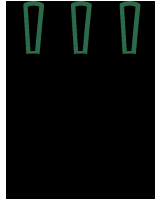

MasterTap is our distinguished beverage dispensing solution that caters to both fully customizable glycol beverage systems and direct draw refrigeration systems.

What sets MasterTap apart is the versatility and adaptability of our products, meticulously tailored to meet the precise specifications and demands of any application!

Glycol-Cooled Beverage Dispensing System

Main Components Include

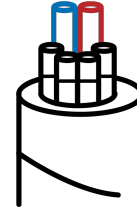

Towers

Built-in aluminum cold block ensures optimal beverage temperature

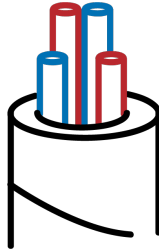

Taps

Dispenses beer, wine, pre-batched cocktails, nitro stout, coffee, etc.

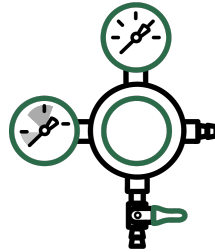

Trunk Lines

Insulated beverage lines that transport beverages from keg(s) to tower(s)

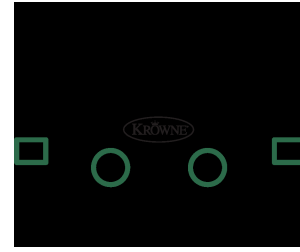

Coolant Connectors

Moves glycol from power pack(s) to trunk line

Regulators

Regulates flow of gas from tanks to blender

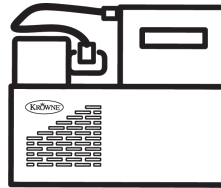

Gas Blenders

Mixes CO2 & Nitrogen to optimal blends for specific products

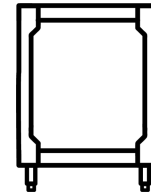

Panels

Designed to protect the integrity of the walk-in cooler wall & to streamline the installation process

Power Packs

Chills & circulates glycol through the trunk lines, maintaining optimal beverage temperature

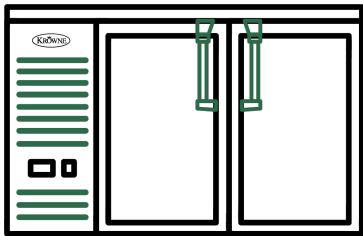

Floor Stands

Capable of holding two (2) Power Packs

Direct Draw Units

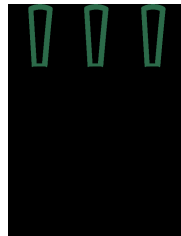

Main Components Include

Refrigerators

Integrated into the same cabinet or housing as the taps & keeps the kegs cold

Towers

Facilitating the smooth and precise pouring of draft beer & a variety of beverages

Taps

Faucets on the exterior of the unit allow you to pour directly from keg

CO2 Tanks

Provides necessary pressure & maintains the carbonation level needed to push beverages from kegs to taps

Temperature Control

Maintains beverages at the desired serving temperature

Drip Trays

Located beneath the taps to catch any spills or drips.
