New Products

Hybrid Speed Sink

Sink Strainer

Recently we unveiled two noteworthy additions to our product lineup. The **Royal Series Hybrid Speed Sink** features a dual function design that seamlessly combines both a hand wash sink and a dump sink in a 18" blueprint. The tiered layout has dedicated drains and faucets for both sinks, optimizing space and hygiene in busy bar environments.

Complementing this, we introduced the **Stainless Steel Strainer** for the Hybrid Speed Sink. Crafted from high-quality stainless steel, the strainer ensures efficient filtration of debris, maintaining the sink's optimal performance.

Together, these additions represent our commitment to elevating the standards of bars and restaurants through smart and reliable solutions!
