## New Products

# FaucetFlex™

BY KROWNE

In 2023, we introduced a handful of innovative products that pushed the boundaries of technology and design. From cutting-edge electronic faucets with advanced eco-friendly features, to the sleek design of the Krowne Home line, we found many forward-thinking solutions.

The products of 2023 showcased a harmonious blend of innovation, functionality, and environmental consciousness. Helping to shape the landscape that resonates with the needs and values of today's consumers!

## Krowne at ASA Network 2023

## Owen Anderson at ASA Network 2023

Krowne's Eastern Territory Sales Manager; Owen Anderson, visited the ASA NETWORK in Orlando, Florida on November 8-10, 2023.

The ASA Network is where industry professionals gather to discuss how we can correctly pass the torch to the next generation of emerging leaders. Putting in place growth plans to help the next generation stay on the right track through mentoring or shadowing programs.

Several speakers came and connected on various topics such as exponential growth; the idea of not being afraid to fail and understanding failing is a learning experience leading you towards meaningful success. Pulling wisdom from individuals who have been seasoned in this industry is a vital part of this growth plan going forward and will help the next generation to future success!
