Key Features

- The protective coating ensures a long lasting and safe operation
- Durable and easy to install
- Available in multiple lengths, interior diameters & kit configurations

Gas Connector Complete Kits

Krowne's **FaucetFlex** configurator introduces an innovative approach to faucet customization, with a special emphasis on Augmented Reality (AR) technology.

This advanced tool allows users to visualize and tailor their faucets in a virtual space, offering a highly immersive and interactive experience. Users can explore various design options, finishes, and features in real-time, enabling them to make informed decisions regarding aesthetics and functionality of their faucet.

The AR component enhances the configurator by providing a lifelike preview of how the selected faucet will look in the intended space, ensuring a seamless integration of style and practicality. **FaucetFlex** not only simplifies the customization process but also elevates user engagement through the power of Augmented Reality.
