Pedestal Base Support System

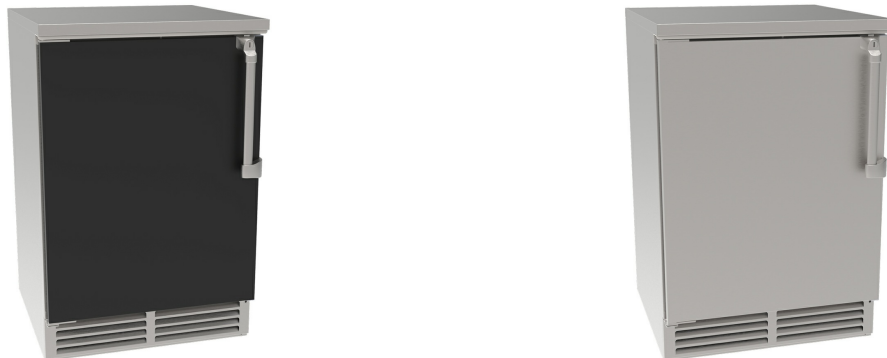

Introducing our new **Pedestal Base Support System**, a structural solution that offers the advantages of a Modular Bar Die system but does not contain a wall, allowing use for all settings, including existing spaces. This versatile offering, composed of stainless steel construction, ensures a stable foundation for underbar equipment.

Its sleek design eliminates the need for legs, providing easy cleanability on the bartender side helping to ensure painless maintenance and a clean work environment. The ample 17" deep base accommodates floor drains, while removeable panels grant easy access to plumbing, soda/beer lines, and the underside of equipment.

Our **pedestal base support system** is an ideal choice for bars and restaurants looking to optimize their underbar area while ensuring long-lasting reliability.

New Back Bar Cooler Size - BS24

Our new **24" One Door Self-Contained Back Bar Coolers** is setting a new standard for beverage cooling. Their compact design and 24" front-to-back depth allows for the seamless integrate into any bar or restaurant environment, aligning perfectly with our existing equipment.

Featuring a back-integrated compressor fan, these coolers offer generous storage space for a wide array of beverages, boasting one bottom shelf and two adjustable shelves per door. Engineered for minimal maintenance, their energy-efficient cooling system not only keeps your drinks refreshingly cold but also helps you save on energy expenses.

No matter what you are serving, our [24" one door self-contained coolers](#) are the ideal solution for keeping your beverages refreshingly cold and readily accessible!

Our Bar & Restaurant Expo Recap

On March 19th and 20th in Las Vegas, we showcased some of our incredible equipment and bartending skills at the [Bar & Restaurant Expo](#) with the incredible [Bad Birdy](#)!

This was Bad Birdy's first time at the event and she was excited to meet so many great people and brands, while also showcasing her incredible skills behind our outstanding [Bad Birdy Mobile Bar](#)!

Thank you to [86thebartender](#) for capturing all the epic moments from start to finish and thank you to everyone who came out to support our team! It was fantastic seeing some old friends and to make great connections with new ones.

This experience was truly incredible and we can't wait to be back for more adventures!

New Features!

DEVELOPMENT UPDATE

BARFLEXPRO OPTIMIZATIONS

- 50% overall configurator speed improvement.
- Added 50 new products.
- The **Move** feature has been updated so that it keeps the Moved element selected, allowing users to press **Move Left/Right** multiple times without having to re-select the equipment you want to move.
- Now when you **Add Equipment**, it automatically selects the unit allowing instant configuration.

FLOORDESIGNER OPTIMIZATIONS

- Ability to submit **FloorDesigner** configurations and receive all necessary files.
- 50% overall configurator speed improvement.
- Added **First Person View** capabilities.
- Display of imperial units readability has been improved.
- Now allows you to type in the dimension of a wall while you are drawing it, instead of only being able to use the mouse.
- You are now able to click the dimension bubble of a wall to select the wall, this was improved because it can be difficult to select a wall without zooming in.

USER INTERFACE UPDATES

- The **Add Equipment** button has been moved to the bottom center of configurator on desktop, and on Mobile it has been moved to the +button.

BUG FIXES

- Fixed configuration and users interface issues reported.
- Fixed issues found in the CAD/Revit export.
